

TUNA OIL TECHNICAL DATA

Nutritional advantages

Tuna oil is a good source of Omega-3, as well as Omega-9 and other important fatty acids that contribute to the health and growth of animals.

Product Application

Tuna oil is ideal for use in balanced animal feed.

Storage and packaging

The product can be shipped in flexitanks of 21,500 kg capacity and with heaters according to the customer's request. For recommendations regarding storage please contact us.

Technical information

The production companies with which we work have crude tuna oil with the following characteristics:

Parameters	By products	Others *
FFA %	< 10	< 7.5
Moisture and impurities %	< 1	< 1
Insaponifiable matter %	< 2.5	< 2.5
Peroxide (meq / kg)	< 10	< 10
Anisidine %	< 40	< 30
EPA + DHA %	28 min	20 min

* This oil is made from the cooking liquids of tuna canning plants.

Labelled

The labels are made based on customer requirements and the regulations of the destination countries.

Certifications

We work with producers certified in the Marin Trust, the Marin Trust Improvement Program and also in the process of certification but who comply with standards such as HACCP and GMP.
